

EUROTECH IN GENERAL

Generated on 10-02-2012

We at Eurotech Group BV aim to build up reliable and mutually beneficial long-term relations with our customers for delivering complete systems, modules and components in the metal-processing industry. We will continue to place the emphasis on maintaining the customers' demands for high quality and delivery reliability and minimizing the customers' costs.

We continually offer our customers development and support in order to achieve this.

We will continue to optimize the working conditions and continue to set challenges for the staff so we can expand our current expertise. Here, we will at least observe current rules on Health and safety and the environment and try to avoid situations harmful to people, the environment and material.

This continuous development, together with the "drive" like an athlete striving to be the best, should enable Eurotech to build on all its previous successes to guarantee the organization's continuity.

Wim Noorman
