## Structural reduction of personnel costs with Techwork.

Techwork Recruitment Agency is specialised in technical professionals from low wage countries.

Employing Techwork technical flex workers as part of Techwork's framework leads to reduction in personnel costs. This framework makes your business flexible with regards to capacity as well as costs, without hurting quality or skill.

Techwork Recruitment Agency is specialised in operators for CNC turning and milling, certified welders, sheet metal workers, construction bench workers, mechanical engineers, electrical engineers, service engineers and foundry workers, primarily from Eastern Europe. Other technical positions may also be filled upon request.

The Techwork technical flex worker possesses the right knowledge and experience to properly perform technical production work. In addition, the Techwork technical flex worker offers low absence due to illness and high productivity.

Techwork offers your business an excellent framework to meet high demands in the market. A solution where the brains of your business and the Eastern European Techwork employees work together.

Your business will gain a good and affordable flexible shell which is of great importance for business continuity.

Techwork Recruitment Agency is part of the Eurotech Group BV that is active in the international industrial supply market.

The employees of the Techwork organisation have built up years of experience in technology and industry and are specialised in selecting and directing the technical professional who matches the work that needs to be done.

Techwork Recruitment Agency is an efficient organisation with a high level of quality; fully compliant to the legal standards and requirements. Techwork is NEN 4400-1 certified, structurally tested by VRO, possesses the VCU certificate and is a member of the ABU.

We would be happy to test the Techwork framework for structural reduction of personnel costs in YOUR business: with you and without obligation.

**Techwork Recruitment Agency: in a class of its own.**
